

ERADICON PEST MANAGEMENT COCKROACH TREATMENT PREPARATION GUIDE

Your home is scheduled to be treated for cockroaches.

The treatment involves applying a gel bait throughout the home that the cockroaches will feed on, as well as applying an odorless product to the baseboards and behind the appliances. There will be no fogging or fumes released into the air. **YOU WILL NOT HAVE TO LEAVE.**

The treatment is **SAFE**, in harmony with EPA label instructions, and poses no risk to your family or pets.

PLEASE READ AND FOLLOW THESE GUIDELINES:

- **Clean the kitchen thoroughly**, including the floor, counter tops, and cabinets.
- Pull out and clean behind **both the refrigerator and the stove**.
- **Remove garbage** or any other food source for roaches (open food containers, crumbs, etc..)
- **Clean any grease** that may have accumulated on range hood, cabinets, or wall
- If possible, **vacuum live roaches** behind appliances and throw out the bag.
- **Do not use any store-bought sprays or foggers**. This will make the treatment less effective.
- **Be patient!** It may take a few weeks for all of the cockroaches to disappear.
