

ERADICON PEST MANAGEMENT

FLEA TREATMENT

PREPARATION GUIDE

Your home is scheduled to be treated for fleas.

The treatment involves applying a low odor liquid product that contains an IGR (insect growth regulator) which will kill fleas at adult, egg, and larval stages. It will be applied to the baseboards and the floors. **YOU WILL HAVE TO LEAVE FOR 4 - 5 HOURS.**

The treatment is **SAFE**, in harmony with EPA label instructions, and poses no risk to your family or pets.

PRE-TREATMENT INSTRUCTIONS

- **Floors must be cleared of clothing and other clutter** to allow treatment of all floor surfaces.
- Rooms must be **cleaned and carpets vacuumed**.
- **Remove or cover any food that is exposed**, including pet food.
- **Please wash pets** with flea shampoo and remove them from the home.
- **BE PREPARED TO LEAVE FOR 4 - 5 HOURS** to allow products to dry.

POST-TREATMENT INSTRUCTIONS

- **DO NOT ALLOW CHILDREN OR PETS TO CONTACT TREATED SURFACES UNTIL DRY.**
- **You may open windows or turn on fans** to help ventilate any odors and to help product dry.
- After 24 hours, **vacuum frequently** to help with any remaining flea eggs or larvae.
- **Continue to use flea treatment medication** on pets.
- **Please do not treat with store bought sprays or foggers.**

Be patient! It may take up to 2 weeks for all flea activity to disappear.
