

# ERADICON PEST MANAGEMENT ANT TREATMENT PREPARATION GUIDE

Your home is scheduled to be treated for ants.

The treatment involves applying a water based and odorless product along the baseboards of your home. Other key areas may be treated as well as the exterior. **YOU WILL NOT HAVE TO LEAVE.**

The treatment is **SAFE**, in harmony with EPA label instructions, and poses no risk to your family or pets.

## **PLEASE READ AND FOLLOW THESE GUIDELINES:**

- **Please do not spray ants** with store bought sprays or foggers before or after your treatment.
- Please **move any clutter or personal items** away from the wall so that baseboards may be sprayed.
- If ants are active around the sink, **please pull items away from the backsplash** of your countertop to allow for application of the product.
- Allow ants to travel freely for a few days after treatment to carry the product back into their nests.
- Do not wipe the counters or mop the floor where the product has been applied for at least a week.
- **Be patient!** It may take up to a week or two for all of the ants to disappear.
